COIN DISPENSING

International coin compatible.
Change denominations any time by software.

LAYAWAY PLANS AVAILABLE FOR AS LOW AS \$500/month!

RECEIPT PRINTER

Integrated receipt printer upon request.
Capable of receipts and payment on hold vouchers.

HIGH END SOFTWARE

The L9ATM software platform in a next-generation system for anti-fraud and fool-proof payment processing.

Our L9ATM software runs the ATM inside and out.

It is responsible for handling all transactions to/from your recycling software, onboard ATM functions, taking a picture of the customer and getting a signature.

Our software can notify you if any certain payment conditions are reached (transactions over \$X or transactions which seem fraudulent)

The L9ATM system sends your software information regarding transactions making it extremely easy to track transaction information and retrieve pictures from the ATM machine.

BARCODE SCANNER

Integrated low-profile barcode scanner available upon request.

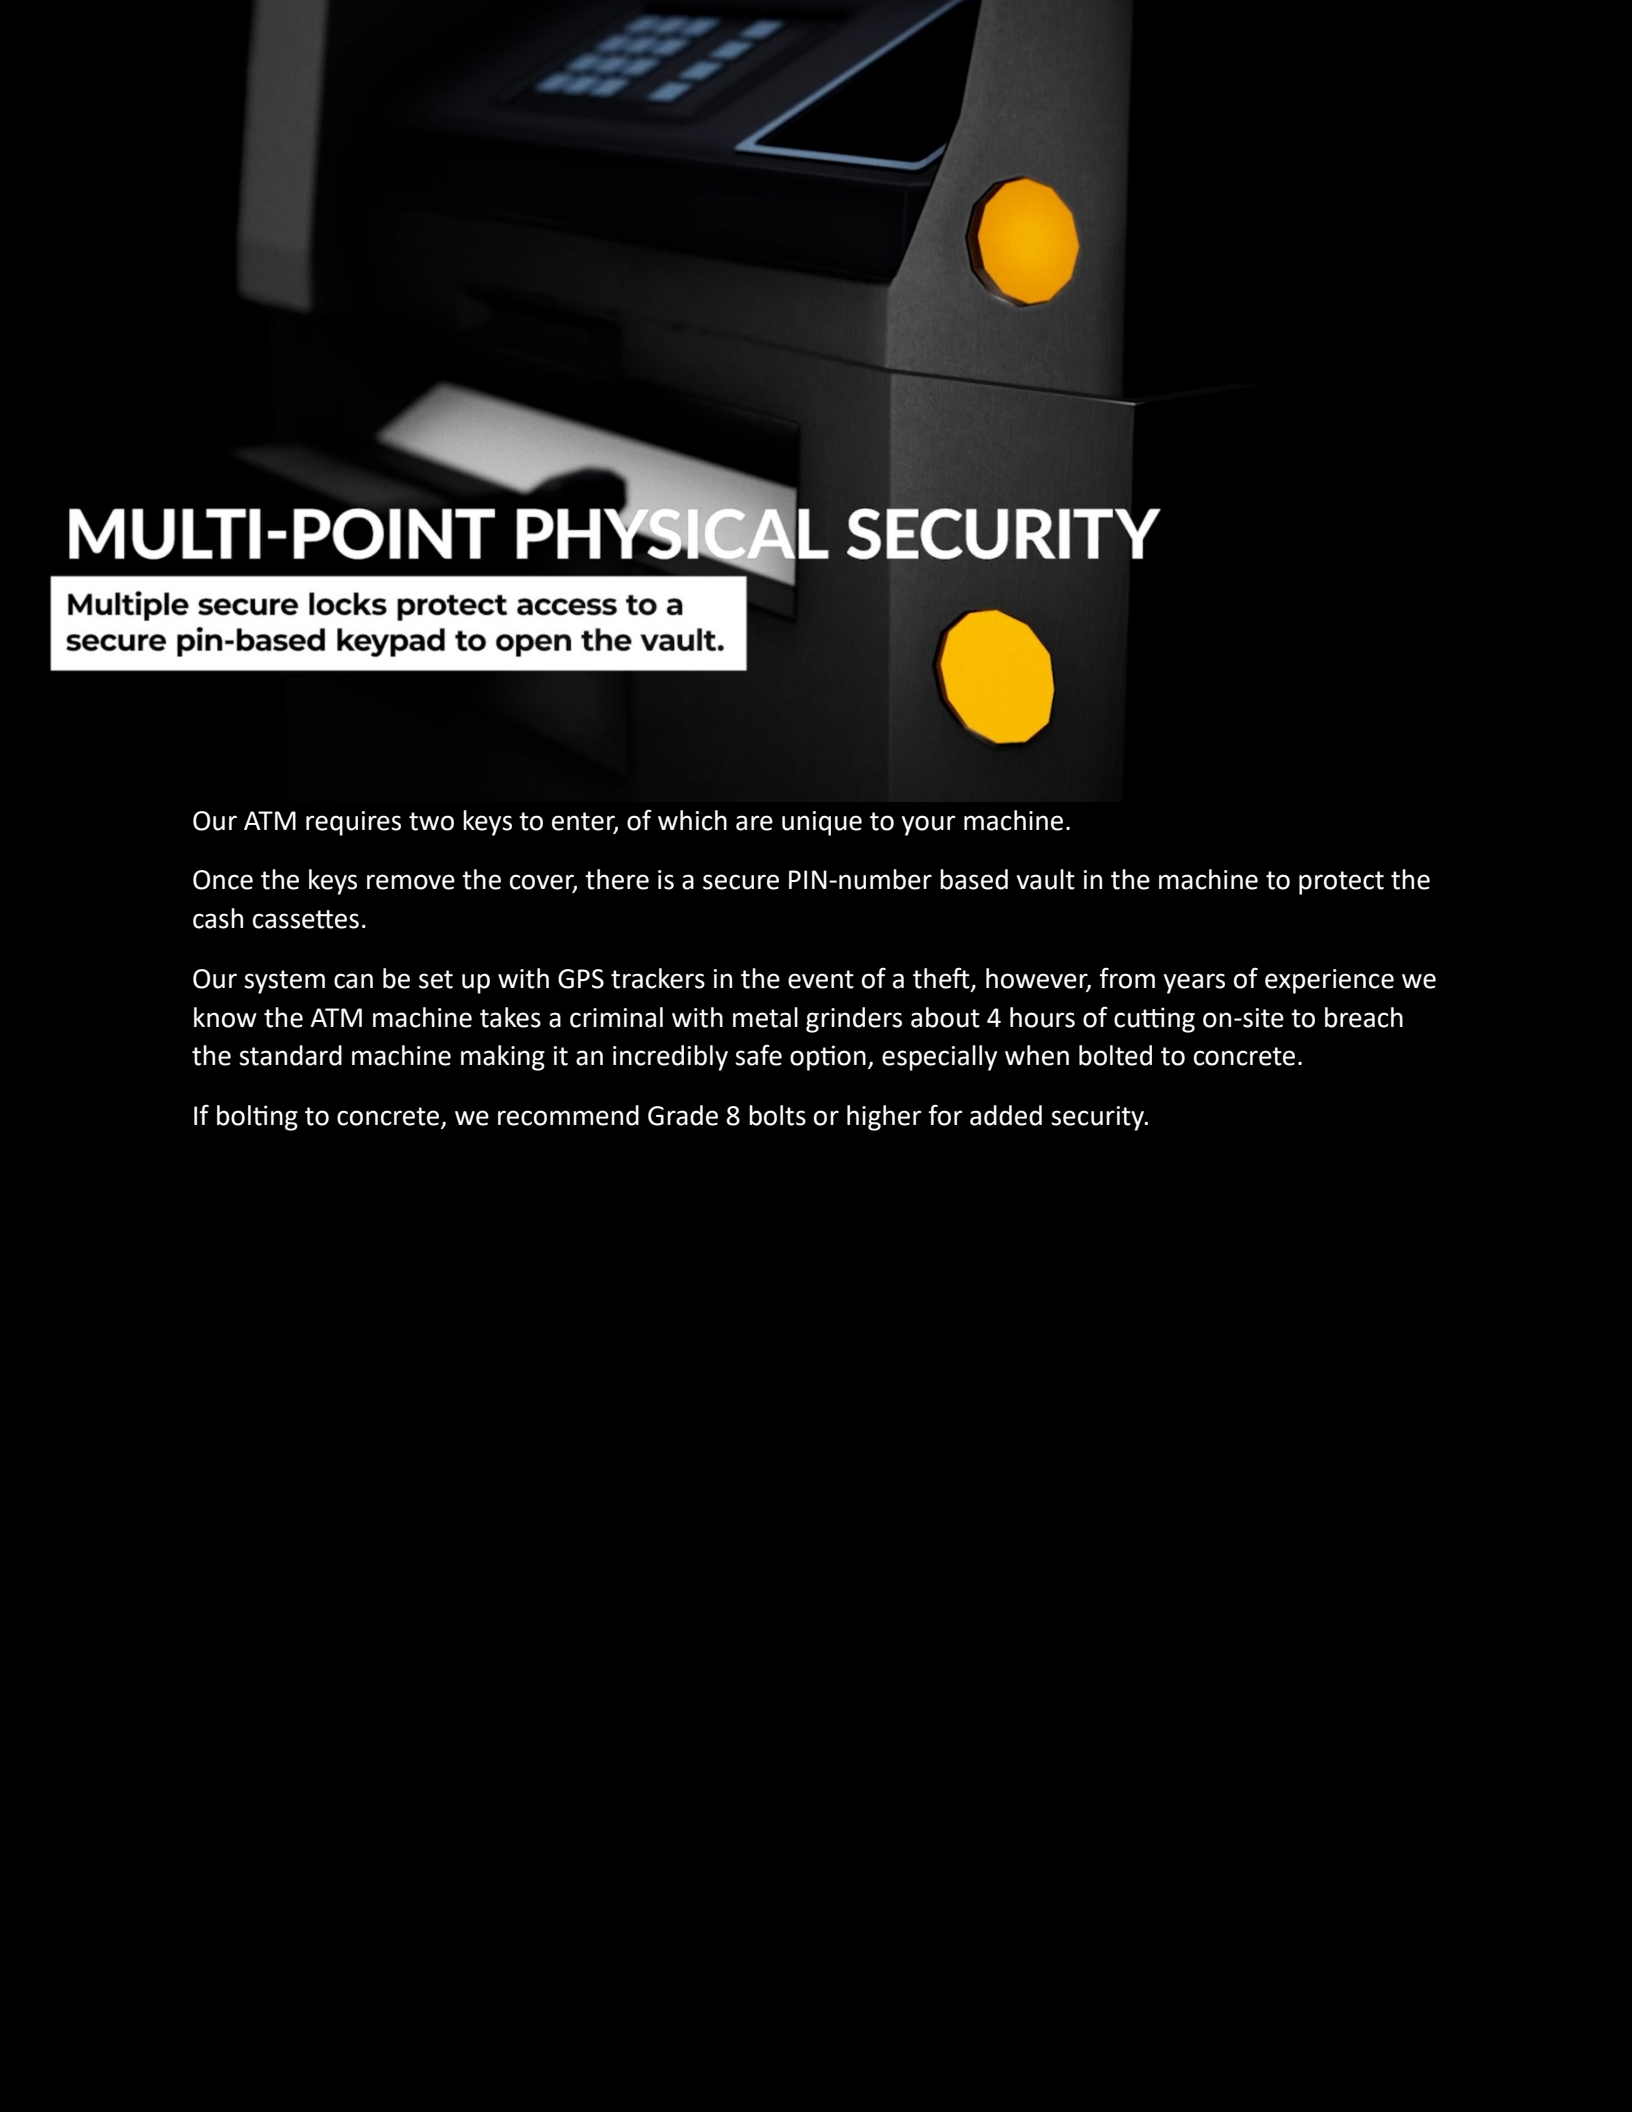

Most customers simply opt for the PIN-number standard configuration.

However, our ATM's allow tickets to also be assigned a pin number for easy customer user experience.

SECURE KEYPAD

PCI-Compliant secure keypad - standard.

MULTI-POINT PHYSICAL SECURITY

Multiple secure locks protect access to a secure pin-based keypad to open the vault.

Our ATM requires two keys to enter, of which are unique to your machine.

Once the keys remove the cover, there is a secure PIN-number based vault in the machine to protect the cash cassettes.

Our system can be set up with GPS trackers in the event of a theft, however, from years of experience we know the ATM machine takes a criminal with metal grinders about 4 hours of cutting on-site to breach the standard machine making it an incredibly safe option, especially when bolted to concrete.

If bolting to concrete, we recommend Grade 8 bolts or higher for added security.

INTELLIGENT MONITORING

The ATM warns you by text message when bills get low or in the event of any error whatsoever.

Our software text messages any pre-set employees when certain denominations of bills or coins are getting low.

You will receive text messages and notifications for many events, including the rare event of a torn bill or something similar causing an issue.

The system always keeps you up to date and informed so you have one less thing to worry about.

FOUR CASSETTES

Four cassettes standard. Each cassette holds up to 2,000 bills.
Maximum ATM capacity \$262,000.00

Quickly and easily replace/replenish your cash.

Change denominations any time you wish in our L9ATM software.

Refill yourself or use a service like Brinks for even more added safety, security and convenience.

UNIVERSAL COMPATIBILITY

**Our ATM units work with ANY software package.
Free payment software is included with every purchase.**

Our ATM's are compatible with ANY software program. You do not have to switch scrap software platforms, or if you do not have software and simply want to just pay customers out, it comes with **FREE** payment software.

ATMS reduce theft and payroll burdens

Reduced human errors on cash distribution
